King of Prussia, PA 19406

Subject: NMP-2 Tech Spec Inspection Report
First Draft

Dear Jim:

Please find enclosed the first draft NMP-2 report. The report is being simultaneously forwarded to the team members for review. Please note the following:

- The report has not been computer spelling checked yet. That will be done following the incorporation of comments.
- Final report pagination and page numbering will also be done following comment incorporation.
- The final report will also be done on a daisy wheel printer. The general spacing and margins of this draft will be maintained.
- My first "fast" review comments are on copy.

Transmittal of your comments can be flexible. If they are extensive, please consolidate them on a single copy and return it to me. If they are nominal, we can handle them via telephone at a time convenient to you.

I will try to return final copy within four or five work days of receipt of your comments and those of the team members.

You can now reach me at our Cleveland office:

Also, we have budget for the post-inspection meeting. Should you want to have one, please let me know as soon as you can. I can make time available on just several days' notice. Based on the inspection findings, I do not feel that a meeting is critical, but remain available.

If any other items arise, please get in touch. As always, I am available for your questions.

Sincerely,

Donald A. Beckman
Vice President
