Phone conversation with licensee on 10-15-82; licensee stated that according to inventory the Seminole, Oklahoma location contained only sealed sources prior to closing on Oct 1, 1982. Licensee has conducted a GM survey of location to assure that no sealed sources remain at this location. All sealed sources have been removed to other locations. Licensee has complied with license condition and since this location contained only sealed sources which have been accounted for a close out survey is not required.
