License No. 12-04390-01  
License No. 12-04390-02

Gentlemen:

This refers to the routine safety inspection conducted by Messrs. J. R. Madera and R. Caniano of this office on November 8 and 9, 1982, of activities authorized by NRC Byproduct Material License No. 12-04390-01 and License No. 12-04390-02 and to the discussion of our findings with you, Charles Griffith and Wayne Weislo at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, no items of noncompliance were identified for License No. 12-04390-02; however, for License No. 12-04390-01, certain of your activities appeared to be in noncompliance with NRC requirements, as described in the enclosed Appendix. A written response is required.

The responses directed by this letter (and the accompanying Notice) are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

*Robert E. Burgin*
