Dear Dr. Krstich:

This is in response to your request for information on Nuclear Regulatory Commission (NRC) standards on waste form stability. Enclosed is a copy of a recent Staff Technical Position, which provides guidance on acceptable methods for demonstrating compliance with the waste form stability requirements of 10 CFR Part 61. As I indicated during our phone conversation of February 11, 1991, these standards are applicable to NRC licensees. I hope you find the information useful.

Sincerely,

151
