

AUG 12 1987

Docket Nos. 50-220
50-410

Niagara Mohawk Power Corporation
ATTN: Mr. Joseph P. Beratta
Manager, System Security
300 Erie Boulevard West
Syracuse, New York 13202

Gentlemen:

Subject: Combined Inspection Report Nos. 50-220/86-23 and 50-410/86-89

This letter refers to the special inspection conducted by Mr. W. G. Martin of this office on October 27-31, 1986 of activities authorized by NRC License Nos. DPR-63 and CFP-112 and to the discussions of our findings held by Mr. Martin with Mr. R. Gayne at the conclusion of the inspection.

Areas examined during this inspection are described in the enclosed NRC Region I Inspection Report (Enclosure 1). Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

No violations were observed. However, we are concerned about the minimum guidance that management has provided to the plant staff regarding the matters enumerated in the Paragraph 2.c of the inspection report. In that regard, your attention is directed to NRC Information Notice (IN) No. 83-27 and to Enclosure 2 of this letter, which addresses, in general terms, our expectations of the considerations that IN No. 83-27 should have prompted. Please provide us in writing within 30 days, those action you have taken or plan to take to address our concerns.

In accordance with 10 CFR 73.21 of the NRC's regulations, Safeguards Information is required to be protected against unauthorized disclosure. Therefore, except for the report cover sheet, the enclosed inspection report will not be placed in the Public Document Room and will receive limited distribution.

The response directed by this letter is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
