Docket No. 03011464
License No. 22-15252-02

Dear Mr. Davis:

This letter is in regards to your letter dated November 2, 1990 referencing 10 CF R30.35 of the NRC Regulation requiring some licensees with quantities of licensed material to submit financial assurance for decommissioning.

According to item I of paragraph III outlining the Demand for Information, I do not believe that Naeve Hospital, License #22-15252-02 is subject to 30.35 demand for decommissioning funding insurance. According to our license, our hospital has only one sealed Cobalt-60 source with a maximum of 5900 curies used for the treatment of patients.

Naeve Hospital is committed to closing the Cobalt department in 1991 thus eliminating the need for an exemption to be added to our license allowing us to have in our possession two sources during source exchange time.

Thank-you for your attention.

Sincerely,

Larry Pfaff
Chief Executive Officer
