Inspection Summary

Inspection on February 4-8, 1991 (Report No. 50-263/91004(DRSS))

Areas Inspected: Routine, unannounced physical security inspection involving Management Support; Protected and Vital Area Barriers; Access Control - Personnel, Packages, and Vehicles; Alarm Stations and Communications; Power Supply; Testing, Maintenance and Compensatory Measures; Training and Qualification; and a review of previous inspection findings.

Results: The licensee was found to be in compliance with NRC requirements within the areas examined. Five previously identified findings were reviewed and addressed in Section 2 of this report and are considered closed. We have concluded that the security program is well implemented and is well managed. Licensee management attention and involvement are strong resulting in a high level of security awareness and performance. There continues to be a significant decline in security procedure personnel errors by the plant work force.
