Lynchburg, Virginia 24505-1260
(804) 385-2000

November 19, 1982

Mr. Walter P. Haass, Chief
Quality Assurance Branch
Division of Engineering
US Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Haass,

In compliance with the organizational change notification requirements, we are providing the following information concerning organization changes within the Power Generation Group of Babcock & Wilcox.

Effective October 15, 1982, the Fossil Power Generation Division (FPGD) and the Nuclear Power Generation Division (NPGD) were combined to form the Utility Power Generation Division (UPGD). Concurrently, International Operations and B&W Canada were combined to form B&W International (Refer to Figure 1).

The UPGD is structured as shown in Figure 2. Its headquarters and commercial nuclear activities remain in Lynchburg, Virginia.

The attached figures will replace Figures 1 and 2 of Topical Report BAW-10096A (Rev 4). We have reviewed these organization changes and find that they have no impact on the QA program commitments contained in our Topical Report. The organization changes will be incorporated in the next revision of Topical Report BAW-10096A.

If you have any questions regarding these changes, please contact Mr. Charles Armontrout (804-385-2473) of the Quality Assurance Section.

Sincerely,

*T. L. Baldwin for
James H. Taylor*
