Docket No. 040-08937

License No. SUB-1501

Valentec Product Development Center  
ATTN: Victor Guadagno  
Vice President/General Manager  
315 Richard Mine Road  
Wharton, New Jersey 07885

Gentlemen:

Subject: Inspection No. 040-08937/90-01

This refers to your letters dated December 14 and 20, 1990, in response to our letter dated November 16, 1990.

Thank you for informing us of the corrective and preventive actions documented in your letter. These actions will be examined during a future inspection of your licensed program.

If you intend to terminate your operations and your licensed program (License No. SUB-1501) in Wharton, New Jersey, it is necessary that you certify the disposition of licensed radioactive materials and that no radioactive materials, devices, equipment, or contamination remains at your facility. After you have disposed of licensed radioactive materials and have conducted a closeout radiation survey, complete the enclosed NRC Form 314 in triplicate. Return the original form to the address specified, submit a copy of the form to the NRC Region I Office, and retain a copy for your records.

Your cooperation with us is appreciated.

Sincerely,

**Original Signed By:**

**John D. Kinneman**
