Docket No. 50-339
License No. NPF-7

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNIT 2
INSERVICE INSPECTION SUMMARY REPORT
FOR THE 1990 REFUELING OUTAGE

In accordance with the requirements of ASME Section XI, enclosed is the Inservice Inspection Report for North Anna Power Station Unit 2 for the 1990 refueling outage. This outage was the ten-year inservice inspection outage for North Anna Unit 2. The first interval examinations are completed with the exception of one Class 1 component support (reference Attachment I, page 11, item O.) This remaining component support will be examined during the next refueling outage. Some second interval examinations were also initiated during this outage. The first inspection interval ended and the second inspection interval began on December 14, 1990.

This report is a summary of examinations performed during the outage. In accordance with IWA-6220 of the 1974 Edition, Summer 1975 Addenda, of ASME Section XI, Attachment I is the Form NIS-1, the Owner's Report for Inservice Inspections, which reports on components examined during the outage for the first inspection interval. In addition, in accordance with IWA-6230 of the 1986 Edition of ASME Section XI, Attachment II is the Form NIS-1, Owner's Report for Inservice Inspections, which reports on components examined during the outage for the second inspection interval. Finally, in accordance with ASME Section XI, 1983 Edition, Summer 1983 Addenda, the NIS-2 Forms, Owner's Reports of Repair and Replacement, are provided as Attachment III.

The detailed outage inspection report will be maintained on file at the station and the corporate office. Should you require additional information, please contact us.

Very truly yours,

W. L. Stewart
Senior Vice President - Nuclear
