Docket No. 030-08198

License No. 29-14859-01

Greenville Hospital  
ATTN: Jean Murray  
Vice President, Patient Services  
1825 Kennedy Boulevard  
Jersey City, New Jersey 07305

Gentlemen:

Subject: Inspection No. 030-08198/90-001

This refers to your letter dated December 8, 1990, in response to our letter dated November 19, 1990.

Thank you for informing us of the corrective and preventive actions documented in your letter. These actions will be examined during a future inspection of your licensed program.

Item A.2 of your letter indicates that film badge records for part time technologists will indicate the technologist's name and social security number. Please note 10 CFR 20.401 requires that each licensee maintain records of radiation exposures on Form NRC-5, in accordance with the instructions contained in that form or on clear and legible records containing all the information required by Form NRC-5. A copy of Form NRC-5 has been enclosed for your review. Please confirm that all required information will be documented.

Item C of your letter states that a cesium-137 check source has been purchased and that the response of the survey meter to the source is checked on each day of use. Please note that regulations require that this meter be sent for calibration and that the recently purchased check source must accompany the meter. The exposure rate from the dedicated check source is to be noted on the meter at the time of calibration. When the meter is returned, the licensee is to check the meter with the dedicated check source each day of use. Please confirm that you will send the meter for calibration with its dedicated check source.
