Mr. Lee H. Bettenhausen
U.S. Nuclear Regulatory Commission
Region 1
475 Allendale Road
King of Prussia, PA 19406

Dear Mr. Bettenhausen:

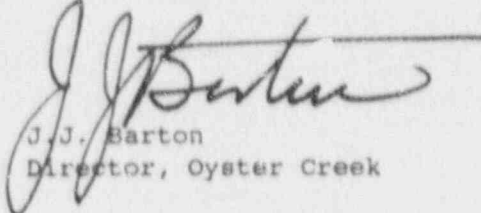

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Response to Inspection Report 90-18

Your letter dated January 3, 1991 identified a problem with the reference material GPUN provided to your office for preparation of operator exams administered in October, 1990. Specifically, the materials were considered incomplete and out-of-date. As requested, this response identifies corrective actions planned to prevent recurrence.

The cause of the occurrence is attributed to a lack of attention to detail in the compilation and verification of the material combined with a lack of clear responsibility for this task. Accordingly, a procedure revision will be made to identify the position responsible for shipment of a complete and current set of reference material. Additionally, the procedure will require a manager or supervisor in the operations training section to personally inventory the material prior to shipment.

If there are any further questions regarding this matter, please contact Mr. Michael Heller, Oyster Creek Licensing Engineer at 609-971-4680.

Very truly yours,

J. J. Barton
Director, Oyster Creek
