EVENT DESCRIPTION AND PROBABLE CONSEQUENCES 10

07 It was discovered on October 12, 1982 that Emergency Service Water (ESW)
08 pump 52A had been declared inoperable during testing and later rendered
09 inoperable for maintenance. This constitutes operation in a degraded
10 mode permitted by a limiting condition for operation as specified in
11 Tech Specs, para. 3.4.C.4. The safety significance of the event is
12 minimal due to the fact that the redundant pump in the system was
13 operable. This event is reportable per Tech Specs, para. 6.9.2.b.2.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS 27

10 The cause was attributed to improper impeller clearance setting. The
11 procedure steps for impeller clearance adjustments were ambiguous. ESW
12 pump 52A was removed from service and the impeller clearance adjusted.
13 The pump tested satisfactorily and was returned to service. Procedure
14 708.1.002 was revised to more clearly detail impeller clearance adjust.
