Gentlemen:

The Baltimore Gas and Electric (BG&E) Company hereby withdraws our request for amendment to Operating License Nos. DPR-53 and DPR-69 for Calvert Cliffs Unit Nos. 1 and 2, respectively, dated October 27, 1989. As indicated below, the information supporting this request has been superseded. Further, this letter identifies that subsequent actions have fulfilled the requirements of Generic Letter 88-11.

NRC Generic Letter 88-11 (Reference a) requested that BG&E perform reactor vessel materials analyses using the guidance of Revision 2 of Regulatory Guide 1.99, "Radiation Embrittlement of Reactor Vessel Materials." We submitted a license amendment request on October 27, 1989 (Reference b), to incorporate the results of those analyses.

Subsequently, BG&E updated these analyses to incorporate additional controls to protect against low temperature overpressure conditions. These analyses also incorporated the guidance of Regulatory Guide 1.99, Revision 2. These controls were submitted for NRC review and were later approved as Unit 1 Amendment No. 146 on September 18, 1990 (Reference c), and as Unit 2 Amendment No. 131 on December 18, 1990 (Reference d).

Since the actions requested in NRC Generic Letter 88-11 were completed with the issuance of Amendment No. 146/131, our license amendment request dated October 27, 1989, is no longer relevant and is therefore withdrawn.

Should you have any further questions regarding this matter, we will be pleased to discuss them with you.

Very truly yours,

STATE OF MARYLAND :
County of Calvert : TO WIT :
