

UNITED STATES NUCLEAR REGULATORY COMMISSION

GENERAL ELECTRIC COMPANY

DOCKET NO. 50-70

NOTICE OF ISSUANCE OF AMENDMENTS TO  
FACILITY OPERATING LICENSE

The U. S. Nuclear Regulatory Commission (the Commission) has issued to General Electric Company Amendment Nos. 9 and 10 to Facility Operating License No. TR-1. Amendment No. 9 revised the Technical Specifications and Amendment No. 10 revised the Physical Security Plan for operation of the General Electric Test Reactor (the facility or GETR) located in Pleasanton, California at the General Electric Vallejos Atomic Laboratory.

Amendment No. 9 consists of a revision to the Technical Specifications by deletion of the requirement to perform certain tests and calibrations while the GETR is in cold (defueled) shutdown condition. Amendment No. 9 when issued on October 15, 1982 erroneously stated that notice was not necessary.

Amendment No. 10 revises the Commission-approved physical security plan and adds certain conditions to that plan.

The applications for amendments comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), the the Commission's rules and regulations. The Commission has made appropriate findings, as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve significant hazards considerations.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR Section 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to Amendment No. 9, see (1) the application for amendment dated February 4, 1982, as supplemented by letters dated March 11, 1982 and April 15, 1982, and (2) Amendment No. 9 dated October 15, 1982 to License No. TR-1.

For further details with respect to Amendment No. 10, see (1) the application dated July 14, 1982, and (2) Amendment No. 10 dated November 17, 1982 to License No. TR-1.

These items are available for public inspection at the Commission's Public Document Room, at 1717 H Street, N.W., Washington D. C. 20555. A copy of items (1) and (2) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 17th day of November 1982.

FOR THE NUCLEAR REGULATORY COMMISSION
