

NOV 18 1982

Docket No. 50-336

Northeast Nuclear Power Station
ATTN: Mr. W. G. Council
Senior Vice President
Post Office Box 270
Hartford, Connecticut 06141-0270

Gentlemen:

We have received a copy of your application dated October 22, 1982, which was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. This application proposed certain Technical Specification changes relating to large and small-break loss-of-coolant accident evaluations for Millstone Nuclear Power Station Unit No. 2. A Class III fee (\$4,000) was remitted with your application pursuant to 10 CFR 170.22.

Based on information provided by the ONRR staff as the result of their preliminary review of your application, it has been determined that the Class III fee (\$4,000) paid is appropriate for Item 2 of your application since the review will involve consideration of a single safety issue. A Class II fee (\$1,200) is appropriate for Items 1 and 3 of your application since these changes are considered to be administrative or pro forma in nature. Therefore, you are requested to remit the additional sum of \$1,200 to this office. If the ONRR staff's final review of your application reveals that these fees are not appropriate, you will be notified and any necessary adjustments will be made.

Sincerely,

Original Signed by:
Reba M. Diggs
