MEMORANDUM FOR: The Files

FROM: James V. Zimmerman, Assistant Director
Export/Import and International
Safeguards, OIP

SUBJECT: PROPOSED LICENSE TO EXPORT COMPONENTS TO SWITZERLAND (XCOM0679)

On October 14, 1982, Westinghouse Electric Corporation applied for a license to export penetration parts to Switzerland to be used in the Leibstadt Reactor.

The applicant has requested expeditious handling of the license application as these components belong to the ultimate consignee and are at Westinghouse for modification, and they are under the warranty period at Westinghouse expense. The applicant promised the ultimate consignee immediate turnaround, and the parts are ready for shipment.

The staff has concluded that the proposed export meets the requirements of the Atomic Energy Act, as amended, and would not be inimical to the common defense and security of the United States.

In view of the above considerations, the staff will issue the license without the normal 15-day waiting period.
