Source and Special Nuclear Materials Branch  
Division of Licensing and Regulation

Reference: LR:JCD, 70-133

Gentlemen:

In your letter of March 23, 1962, you requested the filing of a new application to permit the renewal of License SNM-183 for the period and purpose described in our letter of March 14, 1962. In view of this requirement, our need for the extension has been reconsidered. Since we have no specific plans at this time for further work with enriched uranium, we have decided to withdraw our request for extension as contained in our letter of March 14, 1962.

Since all work with enriched uranium has been completed at this facility, we have been proceeding with decontamination of the area and collecting contaminated materials and equipment for transfer to an approved disposal agency. To permit this action to be brought to an orderly conclusion, we request that our License SNM-183 be extended to July 31, 1962 to complete the remaining cleanup activities and accomplish the transfer of the contaminated wastes.

Your assistance in this matter will be appreciated.

Very truly yours,

D. J. Berger  
Project Administrator
