Dr. Robert Barletta, Group Leader
Department of Nuclear Energy
Brookhaven National Laboratory
Upton, Long Island, New York 11973

Dear Dr. Barletta:

The purpose of this letter is to transmit several items which contain information on the process formerly used by Luminous Processes Inc. in manufacturing aircraft dials made with tritiated paint. I believe this information should be helpful in determining the waste form characteristics of waste shipped from Luminous Processes to burial at the Sheffield disposal site. If we may be of further assistance in this matter please let us know.

Sincerely,

Original Signed By

LeRoy S. Person, Project Manager
Low-Level Waste Licensing Branch
