Subject: Renewal of Special Nuclear Materials License SNM-183

Gentlemen:

We are requesting a renewal of the subject license for a two-year period to run from April 1 1962 to March 31, 1964.

Clevite is no longer engaged in the manufacture of nuclear fuel elements, but is interested only in possible research and development in this area. Consequently, we request that the maximum quantity of special nuclear materials authorized for possession and use be reduced from 55.8 kgs. to 300 grams of U-235 contained in uranium enriched in the U-235 isotope.

This material is to be stored and handled in accordance with the procedures now in effect under the current license.

We trust the above information will be sufficient to enable you to renew our license. If you have any questions or if additional data are required, please contact our Mr. D. J. Berger, Project Administrator, who will provide the necessary information.

Very truly yours,

*A. D. Schwobe*  
A. D. Schwobe, Director  
Mechanical Research Div.
