

Memorandum

TO : Region III Files

DATE: June 29, 1962

FROM : Gen W. Roy, Radiation Specialist
Region III, Division of Compliance

SUBJECT: CLEVITE CORPORATION, CLEVELAND, OHIO;
STATUS OF LICENSE NO. SNM-183

	EDH	LWM
	<i>ka</i>	DAJ
		HP
	EM	File
	VLL	Lesby

CO:III:CWR

70-

Mr. A. D. Scowpe, Director of the Mechanical Research Division, and D. J. Berger, Project Administrator, for the subject licensee were telephoned by this writer on this date in regard to the status of Clevite's Part 70 program.

Mr. Berger stated that Clevite presently has no special nuclear material on hand, either licensed or contract. He added that the last shipment to ORNL of contaminated equipment was made this morning. He stated that he will file the report concerning residual contamination with DL&R shortly (see letter from DL&R to licensee dated 5-28-62.)

Mr. Berger added that Clevite no longer plans to renew SNM-183. The original plans to request license for 300 grams of U-235 for research and developmental work have been canceled. He did state, however, that Clevite plans to retain its "accountability station" for ss materials in the event another AEC contract should be obtained.
