Attention: Mr. Robert D. Vessels
Nuclear Health Physicist

Gentlemen:

Enclosed is a copy of a license amendment issued to Cle vite Corporation May 28, 1962, to enable them to complete decon- taminat ion and to arrange for the disposal of contaminated materials and equipment. A copy of the Cle vite Corporation April 18, 1962, letter referred to in the amendment is also enclosed.

Please note that the values given to Cle vite are suggested levels which we believe should not be exceeded for fixed and removable contaminat ion existing in their facilities. This does not necessarily indicate that these values would be acceptable for uncontrolled release of materials and equip- ment.

Very truly yours,

L. P. Roger Huard, Chief
Administrative Branch
Division of Licensing and Regulation
