Clevite Corporation  
Mechanical Research Division  
540 East 105th Street  
Cleveland 8, Ohio

Attention: Mr. D. J. Berger  
Project Administrator

Gentlemen:

The information contained in your letter of August 14, 1962, regarding the levels of uranium contamination remaining in your facility after completion of decontamination of the facilities and equipment, has been reviewed in connection with the activities performed under the license.

As a result of this review, we have concluded that due to the insignificance of the contamination which may be present on equipment in this particular instance, no hazard to health and safety is involved and no license would be required for any person receiving or possessing such equipment or facilities.

Sincerely yours,

Director  
Division of Licensing and Regulation

Attention: Mr. D. J. Berger  
Project Administrator

Gentlemen:

The information contained in your letter of August 14, 1962, regarding the levels of uranium contamination remaining in your facility after completion of decontamination of the facilities and equipment, has been reviewed in connection with the activities performed under the license.

As a result of this review it is hereby determined that the concentration of special nuclear material present as contamination is so insignificant as to not be considered special nuclear material within the meaning of the Atomic Energy Act of 1954, as amended, and thus not subject to licensing by AEC.
