Mr. John F. Stolz, Chief
Light Water Reactors Branch 2-1
Division of Reactor Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Additional Design Information
BWR Mark II Containment
Shoreham Nuclear Power Station - Unit 1
Docket No. 50-322

Dear Mr. Stolz:

You have recently transmitted two (2) letters to us requesting additional information relative to the design of Mark II containments to account for suppression pool hydrodynamic loads that occur during loss of coolant accidents (letter dated April 18, 1975) and safety/relief valve discharge (letter dated April 21, 1975) events.

In response to these letters, we will provide you with our schedule for submitting the requested containment design information and evaluations by the week of June 2, 1975. This schedule and a program for resolution of this matter is being developed in conjunction with other utilities owning Mark II containments and the General Electric Company.

Very truly yours,
