

NEGATIVE DECLARATION REGARDING  
RENEWAL OF LICENSE NO. SNM-33,  
COMBUSTION ENGINEERING, INC.,  
NUCLEAR FUEL FABRICATION PLANT  
HEMATITE, MISSOURI  
DOCKET NO. 70-36

The U.S. Nuclear Regulatory Commission (the Commission) is considering the renewal of Special Nuclear Material License SNM-33 for the continued operation of the Nuclear Fuel Fabrication Plant at Hematite, Missouri.

The Commission's Division of Fuel Cycle and Material Safety has prepared an environmental impact appraisal for the proposed renewal of license SNM-33. On the basis of this appraisal, the Commission has concluded that the environmental impact created by the proposed license renewal action would not be significant and does not warrant the preparation of an environmental impact statement and, accordingly, it has been determined that a Negative Declaration is appropriate. The environmental impact appraisal is available for public inspection at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. A copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Fuel Cycle and Material Safety.

Dated at Silver Spring, Maryland this 23rd day of November, 1982.
