Attention: Mr. Joseph Delaney

Reference: Special Nuclear Materials License No. SNM-183,
issued March 10, 1958

*Class. Review
not required
3/17*

Gentlemen:

Reference is made to a telephone conversation of March 7 between Mr. McCallum of your organization and the undersigned of Clevite Research Center. The subject matter of the conversation concerned shipping instructions for the special nuclear material required to fulfill Clevite's contract with Nuclear Products-Erco, Division of AGF Industries, Incorporated.

We are pleased to advise as follows:

1. The total amount of special nuclear material required is 9.010 kgs. of uranium in the form of cast metal broken into less than 500 gram pieces, enriched to 90% in the U-235 isotope.
2. It is requested that the total quantity of 9.010 kgs. be shipped to us in one shipment in a standard AEC birdcage, if this birdcage is cadmium lined. In the event available AEC birdcages are not cadmium lined then the single shipment should comprise 2 birdcages each containing 1/2 of the required 9.010 kgs.
3. Shipment should be made to:

Clevite Research Center
Division of Clevite Corporation
540 East 105 Street
Cleveland 8, Ohio
Attention: Mr. E. J. Gilmore

by Railway Express, Armed Surveillance.

Very truly yours,
CLEVITE RESEARCH CENTER
