U. S. Nuclear Regulatory Commission Region II  
101 Marietta Street NW Suite 2900  
Atlanta, GA 30323

Mail Control No: 255484

Dear Gentlemen:

This is to notify that we will begin activities in our Nuclear Medicine Department in Hospital de La Concepción, San Germán P.R. under authorized license number 52-19873-01 for medical use on September 7, 1993. We will be following materials and uses identified in 10 CFR 35.100 and 35.200 for which all required equipment has arrived.

As soon as other equipment required and fume hood is completely installed as per requirements of U.S., Nuclear Regulatory Commission for use of material in 10 CFR 35.300 we will send all required documents for your final evaluation and approval. The Quality Management program is already prepared and will be sent together with other required documents for this part of the license.

Please correct location of use which is Hospital de La Concepción, Ground Floor, Nuclear Medicine Department San Germán, Puerto Rico. It is in the same location as initial operation.

We also want to clarify that our trigger levels for external radiation specified in item 5 of our addendum application is 5 mrem/hr for restricted area and 0.5 mrem/hr in unrestricted area.

Sincerely,

*Eileen M. Hart M.D.*  
Eileen M. Hart, M.D.  
Director and R.S.O. Nuclear Medicine Department
