### NOV 24 1962

Docket No. 50-358

APPLICANT: Cincinnati Gas and Electric Company

FACILITY: Zimmer Nuclear Power Station

SUBJECT: MEETING: ENVIRONMENTAL QUALIFICATION REPORT FOR CLASS TE

EQUIPMENT - NOVEMBER 3, 1982 - BETHESDA, MARYLAND

#### Background

Cincinnati Gas and Electric Company (CG&E) submitted the subject report to the NRC in July 1982. The applicant met with the staff to discuss questions raised during the staff review of the report. The attendance list is enclosed.

#### Summary

The staff indicated that the report was generally good and was organized to facilitate review. Questions discussed during the meeting will be formally transmitted to the applicant for a formal response.

Areas of discussion included drywell temperature profile, inside containment radiation, definition of a "harsh environment," and aging analysis. The staff noted that a relatively small portion of the equipment was qualified. It was therefore requested that the large amount of equipment currently identified as "conditionally qualified" be fully qualified or that a commitment be made to complete the equipment qualification by a certain date. The applicant indicated that additional work has been done in those areas and that the equipment qualification report will be updated.

Following receipt of the applicant's responses to the staff's questions, an audit will be scheduled.
