Gentlemen:

Subject: VIRGIL C. SUMMER NUCLEAR STATION  
DOCKET NO. 50/395  
OPERATING LICENSE NO. NPF-12  
ADMINISTRATIVE CORRECTION TO AMENDMENT NO. 93 REGARDING DIESEL FUEL  
OIL MONITORING (TSP 890003-4) (TAC NO. 74823)

On October 31, 1990, the Nuclear Regulatory Commission issued Amendment No. 93 to the Virgil C. Summer Nuclear Station (VCSNS) Technical Specifications. Amendment No. 93 revised Surveillance Requirement (SR) 4.8.1.1.2, "Electrical Power Systems," regarding diesel fuel oil storage, monitoring, sampling, and analysis. Specifically, the Amendment replaced the requirements for fuel oil verification in SR 4.8.1.1.2(c) with the corresponding requirements in NUREG-0452, "Standard Technical Specifications for Westinghouse Pressurized Water Reactors."

In the July 27, 1989, application for Amendment No. 93 submitted by South Carolina Electric & Gas Company (SCE&G), the requirements in SR 4.8.1.1.2(c) were replaced with the three corresponding requirements [4.8.1.1.2(c), (d), and (e)] delineated in NUREG-0452. This resulted in SRs 4.8.1.1.2 (d), (e), (f), and (g) being re-lettered to 4.8.1.1.2(f), (g), (h), and (i), respectively. After receipt of Amendment No. 93, SCE&G discovered two specifications which reference the re-lettered SRs, but which were not marked-up to reflect this reference in the amendment application. As such, SCE&G requests Nuclear Regulatory Commission (NRC) approval to make the administrative changes to these specifications. Attachment I provides the subject Technical Specifications, marked-up to show the necessary revisions. Attachment II contains the same pages, revised to reference the correct specifications.

These changes are administrative, and in no way affect the NRC's no significant hazards determination concerning Amendment No. 93. The attached revisions merely bring the Technical Specifications into conformity with the intent of Amendment No. 93.
