Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Perry Nuclear Power Plant
Docket Nos. 50-440; 50-441
Amendment 10

Dear Mr. Denton:

The Cleveland Electric Illuminating Company, acting on its' own behalf and as agent for Toledo Edison, Ohio Edison, Duquesne Light, and Pennsylvania Power, is filing herewith three originals plus 60 copies of Amendment 10 to the Final Safety Analysis Report (FSAR) for the Perry Nuclear Power Plant, Units 1 and 2.

This Amendment consists of miscellaneous changes to update the FSAR and incorporates previously submitted responses to the Geosciences Branch, Siting Analysis Branch and Power Systems Branch questions. In addition, revisions were made to the Tables of: Listing of Electrical, Instrumentation and Control Drawings (Table 1.7.1), environmental conditions in various zones (Section 3.11), various containment isolation systems (Section 6.2), and Key Perry Nuclear Power Plant Personnel (Table 13.1-3).

The revised Electrical, Instrumentation and Control Drawings will be submitted under separate cover. We do not plan to provide revised drawings or to update the Listing of Electrical, Instrumentation and Control Drawings until approximately four months prior to fuel load; however, if needed, they will be available for review. This also applies to the subset of drawings that are sent directly to Argonne National Laboratory.

This Amendment is in a format designed to keep current the license application and FSAR. Please insert the revised Amendment 10 material dated November 29, 1982, into the Final Safety Analysis Report as per the attached Amendment 10 Instruction Sheet.
