Docket Nos. 50-348
50-364

Mr. D. G. Eisenhut, Director
Division of Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Reference: Alabama Power Company to NRC letter dated April 12, 1982
(F. L. Clayton, Jr. to J. F. Stoltz)

Joseph M. Farley Nuclear Plant - Units 1 and 2
Steam Generator Tube Integrity (Generic Letter 82-22)

Dear Mr. Eisenhut:

Generic Letter 82-22 entitled, "Congressional Request for Information Concerning Steam Generator Tube Integrity" requested each licensee to provide information regarding steam generator tube maintenance, repair and worker exposures. Alabama Power Company has reviewed these questions and determined that much of the requested information has been supplied to the NRC via reports required annually by the Code of Federal Regulations and the above referenced letter.

Since receipt of this request for information, Alabama Power Company has been in the midst of the first refueling outage for Farley Unit 2 and has also been preparing for the upcoming Unit 1 refueling outage. Resources required to provide additional specific and detailed responses beyond current regulatory requirements are not available.

If you have any questions, please advise.

Yours very truly,

F. L. Clayton, Jr.
