EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

02 | During plant operation, while performing a special investigation to determine the
03 | cause of an event where the suppression pool level exceeded the lower specification
04 | (LER 1-82-114), it was discovered that RHR System discharge valves to the Radwaste
05 | System, 1-E11-F040 and F049, were not fully closed. In accordance with technical
06 | specifications, both valves were declared inoperable, deactivated, and manually closed.
07 | This event did not affect the health and safety of the public.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

10 | The failure of these valves to fully close is presently under investigation. Following
11 | a determination of the cause of the failure, a supplemental report outlining the cause
12 | and corrective actions will be submitted.
