

NOV 26 1982

Docket No. 50-10
Docket No. 50-237
Docket No. 50-249

Commonwealth Edison Company
ATTN: Mr. Cordell Reed
Vice President
Post Office Box 767
Chicago, IL 60690

Gentlemen:

Thank you for your letter dated October 28, 1982, informing us of the steps you have taken to correct the noncompliance which we brought to your attention in Inspection Report No. 50-10/82-13; 50-237/82-17; 50-249/82-18 forwarded by our letter dated September 28, 1982. We acknowledge the test exclusions permitted by the ASME Code, Section XI, Paragraph IWA 4400. However, these test exclusions do not exempt you from the containment leakage tests required pursuant to Appendix J to 10 CFR 50. Following a telephone conversation on November 10, 1982 between Mr. P. Holland of your staff and Mr. J. Grobe of my staff, we understand that the containment water level monitor was included in the Type A integrated leak rate test which was conducted at the conclusion of the 1982 refueling outage. We will examine these matters during a subsequent inspection.

Your cooperation with us is appreciated.

Sincerely,

J. F. Streeter, Chief
Projects Branch 2
