Dear Sir:

Three Mile Island Nuclear Station, Unit 1 (TMI-1)
Operating License No. DPR-50
Docket No. 50-289
Physical Security Plan - Revision 16

Enclosed, please find Revision 16 to the Three Mile Island Modified Amended Physical Security Plan. This revision reflects a minor change in the organizational structure and a date change for the correction of a communications problem in the plant area. An extension is requested from December 1, 1982 to December 1, 1983 to install equipment to permit radio communications in all plant areas, thereby, eliminating dead spot areas. This delay is due to the heavy work load associated with Unit 1 Restart modifications.

This submittal contains Safeguards Information; accordingly, we request that this revision be withheld from public disclosure in accordance with 10 CFR 73.71. The submission of this change provides the required notification per 10 CFR 50.54P.

Revision 16 should be included in your existing plan copy in accordance with the following instructions:
