Re: License SUA-917
Docket No. 40-3453
November 29, 1993 Request for
Information, Partial Response to
Enclosure 2

Dear Mr. Hall:

Transmitted herewith is Atlas Corporation's (Atlas') partial response to the request for information designated as Enclosure 2 in the Nuclear Regulatory Commission's (NRC's) request for information dated November 29, 1993. This submittal addresses erosion protection, construction specifications, and settlement. Additionally, through this submittal, Atlas is requesting a 60-day extension to provide a response to the Enclosure 1 (i.e., faulting, seismic and geomorphic considerations), and the remaining considerations of Enclosure 2 (i.e., erosion control and radon attenuation). The response to the January 3, 1994 NRC request for information will be submitted with these responses.

Work has started on the outstanding issues. Atlas and Canonic Environmental Services Corp. have met with Utah Geological Survey personnel and would like to meet with NRC on February 18, 1994 or during the week of February 21, 1994 to further discuss our approach to faulting, seismic and geomorphic considerations.
