Clevite Research Center  
Division of Clevite Corporation  
510 East 105th Street  
Cleveland 8, Ohio

Attention: Mr. J. E. Dawson

Gentlemen:

Enclosed is Amendment No. 2 to Byproduct Material License No. 31-653-2, issued in response to your application for renewal of that license.

You will note that Condition 17 of that license, which required continuous surveillance of the radiographic area, has been deleted. Your attention is directed to Section 31.301 of Title 10, Code of Federal Regulations, Part 31 "Radiation Safety Requirements For Radiographic Operations", which requires continuous surveillance except under certain conditions. The restriction of your radiographic area, as described in your letter dated 24 April 1961, appears adequate to satisfy the provisions of Section 31.301.

Your attention is now directed to Section 31.202 of Part 31, which requires that instructions concerning each of the subjects listed in that section be included in your operating procedures. In view of this requirement, it is necessary that you amend your procedures at this time to include the following:

1. Instructions concerning the physical radiation surveys required by Section 31.303 of Part 31.
2. Instructions requiring the daily reading and recording of your pocket chambers, as provided in Section 31.203 of Part 31.

70-133  
NLL 6/10

Clevite Research Center (2)

3. Instructions for restricting radiographic areas as proposed in your letter dated 24 April 1961, in lieu of those instructions now contained in Items E3, E5 and E7 of your procedures.
4. Instructions concerning the current provisions of Section 20.101 of 10 CFR Part 20, in lieu of that outdated information now contained throughout your procedures.

Since the Commission's requirements in each of these areas are specifically provided in the referenced regulations, you need not submit your amended procedures to this office for review at this time.

Your attention is now directed to the Commission's licensing requirements contained in 10 CFR Part 30 "Licensing of Byproduct Material". Subsection 30.24(g)(5) of that regulation requires that you submit a description of your organizational structure pertaining to the radiography program. You should prepare that description and forward it to this office at this time.

Very truly yours,

William G. Miller  
Senior Licensing Reviewer  
Isotopes Branch  
Division of Licensing and  
Regulation
