Subject: THEFT OF INTENTIONALLY POISONED LUNCH

A contractor employee, disgruntled by the loss of his lunch from a common-use refrigerator within the protected area 3 days in a row, brought a sandwich laced with rat poison in to work on December 1, 1982. Upon discovering his lunch missing again, the contractor employee notified the licensee about 12:30 p.m. of his actions and the potential danger to the individual involved. The licensee announced the event on the plant page system several times, requesting the lunch thief to report to the site medical representative for treatment. No one has come forth. The contractor employee involved worked in the sewage treatment plant and does not have access to vital plant areas.

Lunch thefts have been a recurring problem at the plant recently.

The NRC received notification of this event at 12:53 p.m., December 1, 1982 and notified Region I.

The licensee does not plan to issue a press release. Media interest is possible due to wide spread interest on the site. NRC:Region I will respond to media inquiries. The State of Maryland has been informed. This PN is issued for information only.
