Subject: Fire Brigade Requalification Training

Reference: A. NRC to FPC letter dated November 21, 1978
B. FPC to NRC letter dated February 27, 1979

Dear Sir:

Florida Power Corporation (FPC) has been implementing the guidance, as described in Reference A, regarding requalification training for Fire Brigade members. FPC's commitment to Fire Brigade Requalification Training was communicated in Reference B. The training program for fire brigade requalification repeats classroom instruction topics four times per year such that all fire fighting subjects are addressed within a two year period.

Crystal River Unit 3's (CR-3) Fire Brigade Requalification Training Program has been reviewed to identify program enhancements. A performance-based training program which meets the immediate needs of the students and provides additional hands-on training for the fire brigade members would better satisfy the needs for CR-3's fire brigade requalification training program. Instruction would be provided four times per year to each fire brigade member. The instruction would address areas which require improvement as identified by drill critiques, student feedback, instructor observations, and industry events.

FPC revises its commitment regarding requalification training for fire brigade members to read as follows:

"The requalification training program provides instruction four times per year to fire brigade members covering areas which require improvement as identified by drill critiques, student feedback, instructor observations and industry events."

This training program enhancement will provide flexibility and will assure the areas requiring increased attention are quickly and effectively addressed. This revised commitment does not decrease the effectiveness of the fire brigade requalification training program.

Sincerely,

P. M. Beard, Jr.
