P. O. Box No. 195
Wayne, Pennsylvania 19087-0195

Dear Mr. Beck:

SUBJECT: RHRSW HIGH RADIATION INDICATING LIGHT ON REMOTE SHUTDOWN PANEL,
LIMERICK GENERATING STATION, UNIT 1 (TAC NO. 69576)

By letter dated April 28, 1988, PECO submitted an application for amendment of Facility Operating License No. NPF-39 for the Limerick Generating Station, Unit 1. The proposed amendment would have changed the Technical Specifications (TSs) to reflect the addition of a Residual Heat Removal Service Water high radiation indicating light to the Remote Shutdown Panel. Based on our review, we conclude that the existing surveillance test procedures provide adequate assurance of the operability of this light and that the proposed TS change is not necessary. We advised your staff of our determination and they concurred with our finding.

The purpose of this letter is to advise that the above cited application is being treated as withdrawn. Notice of Consideration of Issuance of this amendment had not been published in the Federal Register.

Sincerely,

Original signed by
Richard J. Clark
