Gentlemen:

SUBJECT: NRC EXAMINATION REPORT NO. 50-325/94-300

This refers to the Nuclear Regulatory Commission (NRC) administered examinations led by James H. Moorman, III during the period January 24-28, 1994. The examinations were administered to employees of your company who had applied for licenses to operate the Brunswick Steam Electric Plant. At the conclusion of the examination, the examinations and preliminary findings were discussed with those members of your staff identified in the NRC Examination Report, Enclosure 1.

A Simulator Facility Report is included in this report as Enclosure 2. A copy of the written examination questions and answer key, as noted in Enclosure 3, was provided to members of your training staff at the conclusion of the examination.

The enclosed Examination Report identifies activities that violated NRC requirements that will not be subject to enforcement action because the licensee's efforts in identifying and/or correcting the violation meet the criteria specified in Section VII.B of the Enforcement Policy.

In February 1993, one candidate from your facility participated in the Generic Fundamentals Examination. The candidate did not pass that examination.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this examination, please contact us.

Sincerely,

(Original signed by T. A. Peebles)
