Mr. Louis O. DelGeorge
Director of Nuclear Licensing
Commonwealth Edison Company
Post Office Box 767
Chicago, Illinois 60690

Dear Mr. DelGeorge:

This is to confirm the emergency authorization for a Technical Specification change made by Mr. G. Lainas to F. Lentine on December 3, 1982 for the Zion Station, Unit Nos. 1 and 2. Facility Operating License Nos. DPR-39 and DPR-48 are amended on December 3, 1982 for this change.

On December 3, 1982, Commonwealth Edison Company telecopied a letter to the NRC requesting a change to Technical Specification 3.9.2 on the penetration pressurization system. The proposed change was acceptable with the exception of the Action Statement 3.9.2 (a) and (b). These are now as follows:

"a. With two of the three penetration pressurization air compressor systems inoperable, make an effort to restore at least one inoperable compressor and also verify the operability of the nitrogen system.*"

The asterisk on 3.9.2.b is deleted, i.e., 3.0.4 does apply when all three air compressors are inoperable.

The above changes were discussed with the licensee and were substituted for the proposed Technical Specification as submitted.

Copies of the license amendment, our evaluation and Federal Register Notice for this Technical Specification change will be sent to you when completed.

Sincerely,

ORIGINAL SIGNED

Gus C. Lainas, Assistant Director
for Operating Reactors
Division of Licensing
