Gentlemen:

This refers to the routine, announced, initial radiation safety inspection conducted by Messrs. Selvan Rajendran and Gilbert L. Guerra, Jr., of this office on January 9, 1991, of activities authorized by NRC Byproduct Material License No. 35-26964-01, and to the discussion of our inspectors' findings with you at the conclusion of the inspection.

The inspection was an examination of activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspectors.

No violations or deviations were identified.

During the inspection, the NRC inspectors discussed with you: (1) safety aspects of your licensed activities and compliance with regulatory requirements, (2) NRC and DOT requirements, (3) commitments you made during the licensing process, and (4) the NRC enforcement policy.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,
