Mrs. Robert H. Douglass
Box 316, Route 3
Russellville, Arkansas 72801

Dear Mrs. Douglass:

Your letter of July 17, 1973 has been distributed to the members of the Advisory Committee on Reactor Safeguards for their consideration in the review of the Arkansas Nuclear One Unit 1 plant.

The safety of nearby homes and the related plant design features, equipment and procedures to be employed by the applicant are matters which will be considered by the Committee. It is anticipated that the report of the ACRS on this project will be available by mid-August and copies can be obtained from the AEC Public Document Room, 1717 H Street, F.W., Washington, D. C. 20545. Copies will also be available in the local Public Document Room located at the Arkansas River Valley Regional Library, Dardanelle, Arkansas 72834, Attn: Mr. R. Keathley, Librarian.

You should also note that the Committee's meeting on Arkansas Nuclear One Unit 1 will be open to members of the public in accordance with the attached notice. A transcript of the meeting and meeting minutes will also be available as described in the attached notice. There is considerable information regarding this matter in the Safety Analysis Report submitted by the applicant and available in AEC Public Document Rooms.

The attached letter may also be of some interest to you in describing the criteria used in judging plant safety. It is also my understanding that the applicant (Arkansas Power & Light Company) is planning a public meeting this fall to discuss emergency procedures to be used in the unlikely event of an accident at the plant. I am sure that if you contact Arkansas Power & Light they will keep you informed of the details regarding this meeting.

Sincerely yours,

Raymond F. Fraley
Executive Secretary
