December 2, 1982

Mr. J.G. Keppler, Regional Administrator  
United States Nuclear Regulatory Commission  
Region III  
799 Roosevelt Road  
Glen Ellyn, IL 60137

Operating License: DPR-74  
Docket No. 50-316

Dear Mr. Keppler:

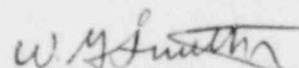

This letter is to confirm our telephone call made to Mr. E.R. Swanson, NRC Region III Resident Inspector, at 1500 hours on December 1, 1982, in accordance with Unit 2 Technical Specification 6.9.1.8 to inform him of the following event.

On December 1, 1982, the Unit 2 West Centrifugal Charging Pump (CCP) was rendered inoperable following a modification performed on the East and West Centrifugal Charging Pump's common mini-flow line. Unit 2 was in Mode 5 at the time and the West Centrifugal Charging Pump was the operable charging pump pursuant to Technical Specification 3.1.2.3.

The scheduled work was to affect only the East Centrifugal Charging Pump and the mini-flow line of the West Centrifugal Charging Pump. The cut was to be made downstream of valve CS-298W which was the isolation point for the West Centrifugal Charging Pump. The actual cut, however, was made upstream of valve CS-298W which is a pressurized portion of the West Centrifugal Charging Pump outlet piping. This rendered the West Centrifugal Charging Pump inoperable and placed the Plant into Action Statement A of Technical Specification 3.1.2.3.

Our investigation into this matter is in progress and a followup report will be submitted by December 15, 1982.

Sincerely,

  
W.G. Smith, Jr.  
Plant Manager
