Gentlemen:

This refers to the Systematic Assessment of Licensee Performance (SALP) Board Report of the Cooper Nuclear Station. The SALP Board met on August 31, 1982, to evaluate the performance of the subject facility for the period July 1, 1981, through June 30, 1982. The performance analyses and resulting evaluation are documented in the enclosed SALP Board Report. These analyses and evaluation were discussed with you onsite on September 28, 1982.

The performance of your facility was evaluated in the following functional areas identified in Section IV of the enclosed SALP Board Report.

The SALP Board evaluation process consists of categorizing performance in each functional area. The categories which we have used to evaluate the performance of your facility are defined in Section II of the enclosed SALP Board Report. As you are aware, the NRC has changed the policy for the conduct of the SALP program based on our experiences and the recently implemented reorganization which emphasizes the regionalization of the NRC staff. This report is consistent with the revised policy.

On September 22, 1982, you were requested to provide comments concerning our evaluation of your facility. In that 20 days have passed, and no comments have been received, the SALP Board Report is being issued as an NRC Report.
