Northeast Ohio Regional Sewer District  
ATTN: Richard N. Connelly  
Water Quality and Industrial  
Surveillance Manager  
4747 East 49<sup>th</sup> Street  
Cuyahoga Heights, OH 44125-1011

Dear Mr. Connelly:

SUBJECT: NRC INSPECTION REPORT 999-90003/94001(DRSS)

This refers to the special inspection and radiological survey conducted by Mr. Ray Glinski of this office on November 23, 1993 of Lagoon A at the Southerly Wastewater Treatment Plant and the telephone conversation between you and Mr. Ray Glinski on February 17, 1994. This inspection also included the review of radioanalytical data on January 26, 1994.

The attached inspection report identifies the areas surveyed. The inspector did not identify any areas within Lagoon A with elevated radiation levels during the gamma radiation walkover survey. Gamma spectrometry analysis of the soil/ash samples collected indicated that none of the samples contained levels of cobalt-60 contamination in excess of the NRC guideline value for decontamination of soil for release for unrestricted use.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

280034

Gary L. Shear, Chief  
Fuel Cycle and Decommissioning Branch

Enclosure: Inspection Report
