Dear Dr. Arnold:

SUBJECT: Inspection 030-30949/94-001

On January 13, 1994, Mary Cahill of this office conducted a routine safety inspection at the above address of activities authorized by the above listed NRC license. The inspection was an examination of your licensed activities as they relate to radiation safety and to compliance with the Commission's regulations and the license conditions. The inspection consisted of observations by the inspector, interviews with personnel, and a selective examination of representative records. The findings of the inspection were discussed with you at the conclusion of the inspection. Based on discussions with you and Ms. Cahill at the time of the inspection, it is our understanding that you have never possessed or used radioactive material authorized by the license, and that you have no current plans to use license material in the future.

Please be advised that you will be required to pay all fees associated with the license, regardless of whether activities authorized by the license are performed.

Within the scope of this inspection, no violations were identified.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter will be placed in the Public Document Room.
