Reply to Notice of Violation, Docket #030-28681, License #15-23181-01

This letter is in response to the above-referenced notice of violation. We were given this violation for a failure to maintain a maximum interval of 6 months between sealed source leak tests. We have corrected this by adopting two designated one-month intervals, June and December, in the calendar year, in which all of our gauges will be leak tested. This corrective action will be begun and documented in June, 1994. We are now in compliance with the six-month, maximum, interval.

Frank Comer
