Dear Mr. Layton:

Re: Source Material License Application for Reno Creek In
Situ Leach Project

As promised in our meeting of February 15, 1994, Energy Fuels Nuclear, Inc. has enclosed one copy of the supporting information for the Source Material License Application for the Reno Creek ISL Project.

This application, and supporting information, were submitted to NRC Ramon Hall of the U.S. NRC URFO office in Denver Colorado, in November of 1993. This copy is provided for your information to expedite and aid you in your initial review of the particulars surrounding the proposed project.

Additional information supporting the Source Material license includes the Application for Waste Water Land Application Facility, submitted January 28, 1994 to the Wyoming Department of Environmental Quality - Water Quality Division, and Information and Design Criteria to Construct Waste Water Facilities (Irrigation Reservoir) submitted to Wyoming Department of Environmental Quality on December 29, 1993. Copies of this information has been provided to the URFO office and it is assumed they will be transferred into your possession in the near future.

If you have any questions or need additional information please contact me at our Denver office.

Sincerely

William J. Almas

WJA/sju
