

DCD/DCB(RIDS)

JAN 24 1991

Docket No. 50-346

Toledo Edison Company  
ATTN: Mr. Donald Shelton  
Vice President  
Nuclear  
Edison Plaza  
300 Madison Avenue  
Toledo, OH 43652

Gentlemen:

This refers to the routine safety inspection conducted by Messrs. P. M. Byron, and R. K. Walton of this office on November 27, 1990 through January 14, 1991, of activities at Davis-Besse Nuclear Power Station authorized by Facility Operating License No. NPF-3 and to the discussion of our findings with Mr. L. Storz at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During the inspection, one item identified in your License Event Report 90015 appeared to be in violation of NRC requirements. The inspection showed that actions are being taken to correct the identified violation and to prevent recurrence. Consequently, we have exercised our discretion as allowed under the NRC Enforcement Policy. Because we want to encourage prompt self-identification and correction of problems, the violation is not being cited because the criteria specified in 10 CFR Part 2, Appendix C, Section V.G. of the Enforcement Policy were satisfied.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

*RS*  
Richard C. Knop, Chief  
React. Project Branch 3

Enclosure: Inspection Report  
No. 50-346/90023(DRP)
